Storm Data and Unusual Weather Phenomena - April 2009

Location Date/Time Deaths & Property & Event Type and Details Injuries Crop Dmg

The Little Wabash River overflowed its banks and spilled across West Fayette Road between Effingham and Lake Sara.

A warm front lifting northward into central Illinois triggered widespread showers and thunderstorms across the area on April 30th. 1 to 2 inches of rain falling on already saturated soils led to minor river flooding in a few spots. In particular, the Little Wabash River overflowed its banks in Effingham County.
